

In the claims:

Claims 1-20 (cancelled).

Claim 21 (original): A booklet comprising:

a top cover and a bottom cover, said top and bottom covers each including an inner face, and said top and bottom covers hinged together along a common binding for allowing movement of said top and bottom covers between an open position, wherein said inner faces of said top and bottom covers are visibly exposed, and a closed position wherein said top cover is positioned in overlying relation to said bottom cover to conceal said inner faces;

said inner face of said bottom cover being structured and disposed for holding a sheet substrate thereon;

an electronic calculator attached to said booklet;

a light emitting device for illuminating the sheet substrate;

a transparent sheet between said top and bottom covers, and said transparent sheet being structured and disposed for magnifying images viewed through said transparent sheet including images appearing on said sheet substrate; and

a plurality of signaling lamps of multiple colors position and disposed to be visible when said top and bottom covers are in said closed position.

Claim 22 (previously added): The booklet as recited in claim 21 wherein said transparent sheet is movable in relation to said inner face of said bottom cover and the sheet substrate held thereon.

Claim 23 (previously added): The booklet as recited in claim 21 further comprising a mirror attached to said booklet.

Claim 24 (previously added): The booklet as recited in claim 23 wherein said mirror is attached to said inner face of said top cover.

Claim 25 (previously added): The booklet as recited in claim 21 wherein said plurality of signaling lamps are structured and disposed to emit a steady light when actuated.

Claim 26 (previously added): The booklet as recited in claim 21 wherein said plurality of signaling lamps are structured and disposed to emit an intermittent flashing light when actuated.

Claim 27 (previously added): The booklet as recited in claim 21 wherein each of said plurality of signaling lamps are individually actuated.

Claim 28 (previously amended): A device comprising:

at least one cover panel having a top side and a bottom side;

said top side being structured and disposed for placement of a sheet substrate thereon;

a light emitting source for directing light onto said sheet substrate;

said light emitting source including a backlight device on said top side of said cover panel for directing light outwardly therefrom and through the sheet substrate placed thereon;

an electronic calculator on said cover panel;

at least one signaling lamp for emitting a distinct light having a character which is clearly identifiable and distinguishable from said light emitting source; and

a transparent sheet structured and disposed for magnifying images viewed therethrough including images on said sheet substrate.

Claim 29 (cancelled).

Claim 30 (cancelled).

Claim 31 (cancelled).

Claim 32 (previously added): A booklet comprising:

a top cover and a bottom cover, said top and bottom covers each including an inner face, and said top and bottom covers hinged together along a common binding for allowing movement of said top and bottom covers between an open position, wherein said inner faces of said top and bottom covers are visibly exposed, and a closed position wherein said top

cover is positioned in overlying relation to said bottom cover to conceal said inner faces;

said inner face of said bottom cover being structured and disposed for holding a sheet substrate thereon;

an electronic calculator attached to said booklet;

a light emitting device for illuminating the sheet substrate;

a transparent sheet between said top and bottom covers, said transparent sheet being structured and disposed for magnifying images viewed through said transparent sheet including images on said sheet substrate; and

at least one signaling lamp positioned and disposed to be visible when said top and bottom covers are in said closed position and said at least one signaling lamp is actuated, and said at least one signaling lamp being structured and disposed for emitting a distinct light having a character which is clearly identifiable and distinguishable from said light emitting device.

Claim 33 (previously added): The booklet as recited in claim 32 further comprising a mirror attached to a said booklet.

Claim 34 (previously added): The booklet as recited in claim 32 further comprising;

a plurality of said signaling lamps.

Claim 35 (previously amended): The booklet as recited in claim 34 wherein said plurality of signaling lamps are structured and disposed to emit a steady light when actuated.

Claim 36 (previously amended): The booklet as recited in claim 34 wherein said plurality of signaling lamps are structured and disposed to emit an intermittent flashing light when actuated.

Claim 37 (previously added): The booklet as recited in claim 34 wherein said plurality of signaling lamps are of multiple colors.
